

NESSIE: NIHR Evidence Synthesis Scotland Initiative

NESSIE is one of nine evidence synthesis groups funded by the NIHR Evidence Synthesis Programme to investigate gaps in knowledge.

Research areas span healthcare, public health and social care.

- Collaboration between
 - University of Edinburgh
 - Glasgow Caledonian University
 - University of Stirling
 - University of Newcastle
 - Patient representatives
- Combines methodological, topic and patient and public involvement expertise across multiple institutions
- Deliver a range of evidence synthesis products to address knowledge gaps or answer a specific need for healthcare, public health and social care stakeholders/audiences
- Allow critical appraisal of research methods, identification of research gaps and prioritisation of studies to fill these gaps
